WALK AWAY AUTO LOCK® (EX, EX-L, Touring)

Automatically locks vehicle when you walk away while carrying the remote transmitter. Especially useful when your hands are full or if you accidentally forget to lock your vehicle.

Follow the steps in the diagram:

- Exit vehicle, close all doors and tailgate, then stay close and listen for a beep indicating the system is activated.
- Walk at least 5 feet away.
- Listen for a beep and look for the lights to flash which confirms the doors are locked.

If you hear multiple beeps in quick succession, this is an indication that the auto lock function did not activate. Check the following:

- Make sure the smart entry remote is not in the vehicle.
- All doors and tailgate must be completely closed prior to walking away.

Note: You may experience interference due to proximity of mobile device

Display Audio Pairing (EX, EX-L, Touring) – Press Settings, then Phone

POWER TAILGATE (EX-L, Touring): While carrying remote transmitter

Stop and Hold (to prevent from opening all the way):

After starting opening sequence, simply stop the tailgate in the desired position by pressing the Remote Transmitter tailgate button. It will hold until closing sequence is started.

Opening Height Setting (to set a desired opening height):

As tailgate is opening, stop it near the desired height by pressing the Remote Transmitter or INNER BUTTON on the tailgate once. Then manually adjust the tailgate to the desired height. Press and hold the INNER BUTTON until you hear a double-beep to confirm the new height is set.

HANDS-FREE ACCESS POWER TAILGATE (Touring)

Use a forward and back kicking motion under the center of the rear bumper to open or close the power tailgate while carrying the remote transmitter.

For best results:

- Do not stand too close to the bumper (approximately 2 feet away) when performing the kicking motion.
- The kicking motion should be performed in a quick, fluid motion (approximately 1 second in duration). If you hold your foot under the bumper for too long, the power tailgate does not open or close.
- The sensor **will not read** a side-to-side swiping/waving motion.

A beep sounds and exterior lights flash **after** the kicking motion has been performed properly as confirmation that the hands-free access has been activated.
