

WHAT'S NEW FOR 2023

CIVIC
TYPE R

Back for 2023, the Civic Type R represents the absolute pinnacle of Honda front-wheel drive performance.

New and improved in every way, the 2023 Civic Type R was designed to spend its weekends conquering racetracks worldwide, while still providing a comfortable ride and excellent road manners for the daily commute during the week.

FEATURE	FUNCTION	BENEFIT
315 hp / 310 lb ft of Torque	More horsepower and torque	Improved acceleration during spirited driving
Lighter Flywheel, More Efficient Turbocharger	Quicker throttle response and Rev-match	Smoother shifting, with little rev hang on upshifts and greatly reduced shift shock on downshifts
High-Rigidity Suspension Components	Refined ride and handling	Suspension improvements give drivers better feedback to improve steering response and handling
Integrated Wide Fenders, Pedestal Mount Rear Spoiler	Sophisticated exterior design	"Form Following Function" design makes Type R more appealing to a wide audience
High Bolstered Sport Seats with Suede-Effect Fabric	Performance-minded yet comfortable seats	Performance seats keep the driver and passenger secure during aggressive driving but are comfortable enough for daily use
19" Wheels with 265/30/19 Michelin Pilot Sport 4S Tires	Smaller diameter wheels than previous generation Type R combined with 20mm wider tires	Designed with Michelin, the dedicated Sport 4S provides the ultimate in handling and grip while the 19" wheel gives a better ride
10.2" Digital Instrument Cluster and 9" Color Touchscreen	Latest Honda in-vehicle technologies	Drivers can configure displays to their liking, and the intuitive interfaces allow them to interact with the Type R quickly while keeping their focus on driving
Embedded LogR App	Improved data acquisition	The LogR app provides vital data to those drivers wanting to hone their track skills
Four Drive Modes including Individual	Drive Mode personalization	Individual Drive Mode lets drivers configure their Type R to suit their driving needs
