

How to Use the Universal Remote System (HomeLink®)

This vehicle is equipped with a system that can replace the remote controls for garage doors, security gates and more. To set it up and use it for garage doors:

1

Park the vehicle outside facing the garage door and directly in line with the garage-door-opener receiver.

2

On the vehicle's color touch-screen home screen, touch the Controls icon:

Touch More Controls, then Universal Remote System.

Select Add Remotes.

3

Hold the door opener's remote control from 1 to 3 inches from the inside rearview mirror.

Press and hold the remote's button until Signal Found appears on the color touch-screen, then release the button.

4

On the color touch-screen, touch the Test button. Does the door garage door move?

NO

Touch the It Didn't Work button.

The programming is successful; touch the It Worked button, and you're done.

YES

Go to www.homelink.com for self-help videos or call 1-800-355-3515.

NO

5

On the garage-door opener receiver in the garage, locate the Learn or Smart button and press it.

Within 30 seconds, touch the Test button on the color touch-screen. Does the door garage door move?
